

LED LIGHT FOR LOCAL LIGHTING (P/N 331206.001)

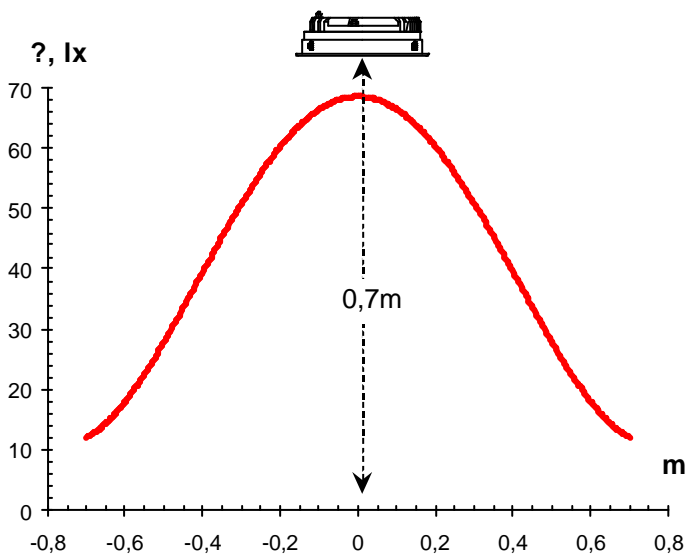

LED light is intended to provide local lighting in cabin of aircraft.

- Solid state reliability
- Energy savings
- Electrical safety
- Easy mount

TECHNICAL SPECIFICATIONS

Source of light	6 Luxeon ^{??} LEDs
Color	white
Typical color temperature (CCT), °?	4500 – 6000
Maximum operating current, ?	0.35
Power consumption, W	7
Recommended power source	Current stabilizer P/N 436624.001.000, «KVAND»
Case	aluminum alloy
Lens	PC (clear) + holographic diffuser
Weight, kg	0.18

Distribution of illuminance
